

FREE & NATURAL

IT'S THE WAY YOU'VE ALWAYS WANTED TO SHOWER

 **Solahart**[®]

hot water free from the sun

HOT WATER FREE FROM THE SUN, NATURALLY

Free & Natural. It's the way you've always wanted to shower.
With a Solahart® hot water system it's more than just a feeling.
It's a fact of life, and it's yours to enjoy everyday.

Solahart's slim solar panels on your roof will do it. As the water circulates, the sun heats it naturally so you get luxurious hot water heated free from the sun. On tap. Everyday.
Now that's what you call Free & Natural!

Hot water which saves on energy, saves on water heating costs and helps save the environment too. With a Solahart hot water system you get it all. And it's all Free & Natural. Now isn't that the way you've always wanted to shower!

THE SCIENCE WHICH HELPS YOU SAVE IN 3 WAYS

When you install a Solahart you'll be benefiting from over 50 years experience as the market leader in solar hot water in Australia and the world.

Our solar panels are designed to efficiently collect the sun's available energy and use it to provide you with hot water on tap for all your needs. Hot water which helps you save in three ways.

1 SAVE on energy

By using the sun's free energy you can reduce your hot water energy consumption by 50% to 90%* depending on where you live.

That's up to 90%* less gas or electricity which needs to be produced.

2 SAVE on water heating costs

Reducing your energy usage will give you real dollar savings every day. An average home can expect to save around \$375* off its energy bills - year after year. And with the way energy costs are increasing around the world, the savings could be even greater in the future.

3 Helps SAVE the environment too

Not only will you make big savings on your energy costs, using the sun's free energy is great for the environment.

A family of four with a Solahart water heater can save up to 3.5 tonnes of greenhouse gas emissions compared to a conventional electric water heater. That's the same as taking a small car off the road, so you can imagine the benefits for our future generations and the future of the planet.

THE SYSTEM WHICH PAYS FOR ITSELF IN 3 WAYS

Because it's so incredibly efficient, a Solahart water heater can pay for itself over the life of the system. That's something no conventional water heater can claim.

1 You can make big savings on your water heating costs

The average savings of \$375* every year in energy costs, compared to conventional electric water heaters, on a continuous tariff, quickly adds up to big savings over the life of the Solahart system.

2 You can get government incentives and rebates

Because a Solahart water heater is so good for the environment there is a Federal Government incentive with Renewable Energy Certificates (RECs) and some States and the Federal Government offer a rebate which can significantly

reduce the initial investment of a new Solahart system.

The available incentives vary according to your location, the type of water heater you are replacing and the type of Solahart system you install, so check with your local Solahart Expert to see how much you could save.

3 Solahart backup

Solahart has over 50 years experience in the design of solar water heaters to suit Australia's varied climate and sometimes harsh conditions. Designed and manufactured in Australia, Solahart water heaters are backed by an extensive service network for additional peace of mind.

*Refer to page 10 for conditions. Average savings based on a 302J or 302L system in Zone 3 replacing an electric storage water heater on a tariff of \$0.1287/kWh.

THE PERFORMANCE WHICH MADE US AUSTRALIA'S MOST POPULAR SOLAR WATER HEATER

We're good looking, long lasting

Solahart solar water heaters are the best looking in Australia.

Our elegant, roof-mounted, slimline tanks are manufactured with a double ceramic lining and a replaceable protective anode to prolong the tank life. Our aluminium encased collector panels are also extremely weather resistant to ensure your system will look good for years.

Alternatively, you can choose the Streamline® system, where the slim collector panels are located on the roof with the tank installed at ground level, or our Synergy heat pump which doesn't require roof mounted collectors at all.

We're high performance - Hot water on tap every day!

All Solahart systems have an auxiliary booster to ensure you have hot water at the turn of a tap, even during the colder and darker days of winter.

We're fast – Installed within 24 hrs

If your water heater breaks down and you need to replace it urgently, your local Solahart Expert can have you back in hot water within 24 hours in most instances.

With over 80 Solahart dealers around Australia you'll never be far from your nearest one.

THERE IS A SOLAHART SYSTEM TO MEET EVERY FAMILY'S NEEDS

Solahart manufactures a wide range of systems to meet your needs regardless of where you live.

Which type of Solahart is best ?

Solahart has developed systems optimised for Australian conditions. The major factors which need to be considered when choosing the best system for you are:

- The amount of available solar energy based on your geographical location
- The likelihood of frost
- The quality of your water

Water quality

Water quality varies around Australia though most town water is considered to be good. Solahart has models to suit known harsh water areas.

Which kind of booster is best for me ?

You can choose either a gas or electric booster for your roof mounted or Streamline solar water heater to supplement the sun's energy on cloudy and colder days.

The Solahart Synergy® heat pump is supplied complete with an electric booster.

Ask the expert

To select the best Solahart system for your family, talk to your local Solahart Expert. They will be delighted to discuss your situation and your hot water usage to ensure you get the Solahart which meets your requirements. They can also advise on available government incentives and rebates which can make your Solahart even more affordable.

THE SOLAHART SYSTEMS

Solahart Thermosiphon Systems

Our roof mounted Thermosiphon systems save on valuable space at ground and floor level. We have developed a wide range of systems to suit all of Australia's climatic and water quality conditions.

Our Free Heat models feature enhanced protection and an extended 10/5/5+ warranty.

Kf Series

Delivers maximum efficiency and is recommended for low solar gain areas:

- Save 60% to 90%* of your water heating energy consumption
- Suitable for frost prone or harsh water areas
- 10 & 5 year warranties available

J Series

The efficient choice for medium - high solar gain areas:

- Save 50% to 80%* of your water heating energy consumption
- Suitable for frost prone or harsh water areas
- 10 & 5 year warranties available

L Series

The economical choice for medium - high solar gain areas:

- Save 50% to 85%* of your water heating energy consumption
- 10 & 5 year warranties available

Solahart Streamline

The Solahart Streamline® combines high efficiency, roof mounted collectors with a ground-mounted tank minimizing the visual impact on your home.

- Models available that are suitable for frost prone or harsh water areas
- Save 50% to 85%* of your water heating energy consumption
- Peace of mind with Solahart's 5 year conditional warranty

Solahart Synergy

The Solahart Synergy is like a solar water heater without the collector panels. Instead, it uses amazingly efficient heat pump technology to extract the heat from the surrounding air, much like a refrigerator in reverse.

- Suitable for a wide range of locations
- Save up to 2/3* of your water heating energy consumption
- Minimal visual impact
- Peace of mind with Solahart's 5 year conditional warranty

For further information ask your local Solahart Expert for the relevant Product Information Sheet.

† Warranty Details

Water heater and collector warranties installed in a single family domestic dwelling. **Thermosiphon Systems:** 10/5/5- 10 Year cylinder and collectors, 5 year parts, 5 year labour. **S/5/5** - 5 year cylinder and collectors, 5 year parts, 5 year labour. **Streamline Systems:** 5/3/1 - 5 year cylinder and collectors, 3 year labour on cylinder, 1 year parts, 1 year labour on parts and collectors. **Synergy Systems:** 5/3/1 - 5 year cylinder, 3 year labour on cylinder, 2 year sealed system including labour, 1 year parts including labour.

Gas Booster: 5/3/1 - 5 year heat exchanger, 3 year labour on heat exchanger, 1 year parts including labour.

*Refer to page 10 for conditions.

HOW TO KNOW YOU'RE MAKING THE RIGHT CHOICE

When you install a Solahart water heater you can be sure you are making the right choice.

Solahart has over one million happy customers

As the market leader, Solahart has been manufacturing solar water heaters since 1953 and since then we have sold over 1,000,000 units in over 70 countries around the world.

With so many happy customers, you can be sure we have a system to fulfil your needs, regardless of where you live.

Each Solahart system is backed by our comprehensive warranty

Every Solahart water heater comes with a factory warranty covering all major components, parts and even labour.

So you can relax and enjoy the fact you're getting your hot water free from the sun, secure in the

knowledge that we're behind our product all the way.

You can get your Solahart now with NO INTEREST EVER!

Solahart SmartPay[‡] is a simple payment plan, which allows you to spread your payments over 12 months and pay NO INTEREST – EVER!

There are no credit checks, just a quick, over the phone, approval process. Then, with a deposit of just 25%, you can enjoy all the benefits of Solahart hot water while you make convenient fortnightly or monthly payments over the following year.

[‡] Solahart SmartPay is provided by Certegy Australia to approved customers.

SO WHAT ARE YOU WAITING FOR ?

A Solahart will save you money, save energy and is great for the environment and can be surprisingly affordable.

Your local Solahart Expert will be more than happy to advise you on which of the Solahart water heaters is best for your needs and to show you how much you can save and just how inexpensive a Solahart can be.

Call your local Solahart Expert on 1300 769 475 to enjoy the free & natural feeling of Solahart hot water free from the sun.

For more information visit www.solahart.com.au

Materials and specifications for all products are subject to change without notice.

* Savings of 50 -90% shown are based on Australian Government approved TRNYS simulation modelling. Maximum financial savings off your hot water bill are achievable when replacing an electric water heater on continuous tariff. Savings and incentives will vary depending upon you location, type of Solahart system installed, orientation and inclination of the solar collectors, type of water being replaced, hot water consumption and fuel tariff.
