# PV Small-Scale Technology Certificate (STC) Assignment Form

## What is a Small-Scale Technology Certificate?

The Owner of a Solar Power System installed in Australia may qualify to create, or assign their right to create, Small Scale Technology Certificates (STCs). This can only be done **AFTER** the system has been installed.

You can create STCs directly, by registering with the Clean Energy Regulator, or you can assign your right to create STCs to a registered Agent such as Solahart Industries Pty Ltd ABN 45 064 945 848 (Solahart). You are not obliged to assign your right to create STCs to Solahart. If you choose to do so, you will receive the financial benefit either by Point of Sale Discount or after the STCs have been created.

Solahart will pay the rate advertised on our website <u>www.solahart.com.au</u> on the day that we <u>receive</u> the forms. The value of an STC may vary from day to day depending on market supply and demand.

To find out how many STCs your system is eligible for and our current STCs price contact, your local Solahart Dealer.

To find out more information about STCs see the government website at <a href="http://ret.cleanenergyregulator.gov.au">http://ret.cleanenergyregulator.gov.au</a>.

To view our privacy statement, go to: www.solahart.com.au/copyright-privacy.aspx

Important: Under the Renewable Energy (Electricity) Act 2000, penalties can be applied for providing misleading information on this form, to the person assigning the STCs, to the dealer or to Solahart as the registered agent. This applies to the owner of the system, the installer, designer, builder and dealer.

#### **Terms and Conditions**

- 1. It is the Owner of the system at the time of its installation that has the right, under the Act, to create or assign their right to create STCs. No other person or entity can legally create, or assign the right to create, STCs unless contractually agreed.
- The time at which a solar power system is taken to have been installed is the date at which:
  - -t is capable of generating electricity in a form that is usable at the eligible premises where it is installed without the need for an additional part or parts to be added to or incorporated into the unit, and
  - -t is wired directly to the premises where it is installed, so that its output is capable of being metered at the premises <u>or</u> the unit includes a meter that is dedicated to measuring its electricity output.
- 2. If more than one system has been installed, assignments for each system must be on separate forms. Please include a detailed description to allow us to distinguish between them. E.g. Solar Power System West. Attach a document that clearly shows or describes the location of the systems.
- 3. Solahart will not pay compensation for any variance and reserves the right to change the price offered for STCs without notification.
- 4. Information on this form will be given to the Clean Energy Regulator who may use it for auditing purposes.
- 5. The installation address must be detailed enough to allow the Clean Energy Regulator to conduct a site visit, if required.
- 6. This form and required attachment(s), with all required information complete and correct, must be received by the Solahart STCs Administration within 11 months of the installation date, in order to allow the creation of STCs by Solahart; otherwise a financial benefit may not be paid.
- 7. Solahart reserves the right at its sole discretion to refuse multiple assignment requests.

## **Attachment Checklist**

Incomplete applications will be returned without processing. Please ensure you attach:

**Proof of Purchase** (this is the invoice from the installer/agent to the customer). This must clearly show any point of sale discounts

(if given). It must show the customer's out of pocket expenses.

An Invoice for the STCs financial benefit (only if the payment is to be made to a business). The invoice should be made out to

Solahart Industries Pty Ltd and must show your ABN. If you are charging GST this should be a tax invoice.

A Written Declaration by the Installer, designer and retailer stating that all installation requirements have been met

(Please use the Solahart Installer, Designer and Retailer Declaration Template)

An electrical installation compliance certificate

If requested, information demonstrating that the serial numbers entered into the REC Registry are the serial numbers of solar panels installed at the address, such as a clear photo of the barcode label or sticker, obtained from the solar panel label. Panel barcodes that have been scanned from pallet sheets or similar do not demonstrate the installation of panels. It is recommended that these photos are taken at the time of installation to avoid returning to the site after installation and delays in processing.

If requested, information demonstrating that the accredited installer entered into the REC Registry attended the installation at job set up, mid-installation check-up and during testing and commissioning, in accordance with section 6 of the CEC install and supervise guidelines for accredited installers. Information demonstrating an accredited installer was onsite could include photographic identification of the accredited installer (with time and date metadata or geo-location data) during installation job set up, mid-installation check-up and testing and commissioning.

Send Form and Attachments to Solahart: stcs@solahart.com.au

## PV Small Scale Technology Certificate - Installer's Declaration

(installation address)

otatomont by the motane.	
l,	_(name of the installer), was the accredited CEC installer and
hold the appropriate accreditation type for the Solar PV system install	ed at

 I confirm that the installation of the system was performed by the person in the table below and that the installation meets the requirements of CEC accreditation guidelines.

	Name	CEC Accreditation (GC/SPS)	CEC Accreditation Number
Installer			
Installer Address			
Phone		Email	
Company Name			

### I verify that:

Statement by the Installer

- I complied with the relevant installation requirements of the accreditation scheme under which I am accredited for the installation of the unit
- All local, State or Territory government requirements have been met for the installation of the unit
- The electrical wiring associated with the installation of the unit was undertaken by an electrical worker holding an unrestricted licence for electrical work issued by the State or Territory authority for the place where the unit was installed
- I have provided the owner of the unit with any documents required by the laws of the jurisdiction in which the unit was installed certifying that the installation of the unit complies with the relevant laws relating to safety and technical standards
- I received a copy of the design of the unit, and
  - The design was not modified during the installation of the unit and it was installed in all material aspects, in accordance with the design, or
  - The design was modified during the installation of the unit and the modifications were consistent with all relevant requirements of the accreditation scheme for the design of the unit and that the unit was installed, in all material aspects, in accordance with the modified design
  - o The unit will perform consistently with the design or modified design (as applicable)
- That the inverter used in the installation of the unit was an approved eligible model of inverter and if grid-connected complies with AS/NZS 4777.2:2020
- That the model(s) of PV modules used in the installation of the unit was an approved eligible PV module
- I was on-site to install or supervise the installation of the unit in accordance with the accreditation scheme under which I am accredited
- I have and can provide evidence demonstrating that I have met the on-site attendance obligations in accordance with the accreditation scheme under which I am accredited.

I declare that the above statements are true, correct and complete and understand that under the *Renewable Energy (Electricity) Act 2000* and Renewable Energy (Electricity) Regulations 2001 penalties apply for providing false or misleading information. I understand that giving false or misleading information is a serious offence under the Criminal Code Act 1995.
